***Response to Amendment***

The preliminary amendment filed 1/31/2007 has been entered.

Claims 12,13,16-20 and 22 have been cancelled. Claims 7,14,21 have been amended; and claim 25 has been newly added. Currently claims 7-11,14,15,21 and 23-25 are pending for action.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 25 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It is not clear if the specification has support for the language of first and second sutures i.e. "sewing the ventricular patch to the inner surface of the ventricle with **first sutures** so that the central area of the patch defines a

Art Unit: 3738

portion of the ventricle of the heart; and sewing the outer rim to the inner surface of the ventricle with **second sutures** outward of the first sutures and outward of the portion of the ventricle of the heart to inhibit blood from leaking from the ventricle".

### ***Allowable Subject Matter***

Claims 7-11,14,15,21,23,24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: examiner agrees with applicant's arguments that Dor's patch is sewn around its periphery only. The rings in Das and Mulhausen are not sewn to the affected tissue. There is no motivation suggested by Mulhauser or Das for one seeking to improve a patch for the ventricle of the heart as in Dor to select any of his devices, let alone the device with an outer rim as in Figure 4(a) rather than one of his devices with no outer rim, particularly since the device of Figure 4(a) is intended for surgery in a completely different organ from Dor. Second, there is no expectation of success or improvement if the isolated features or embodiments of Das and Mulhauser were combined with the patch used in Dor's surgical method. Both Das and Mulhauser are concerned with completely different types of surgical procedure from that of Dor.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3738

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
